

STACY WERE

IT Specialist | Security Analyst

stacywere@gmail.com | +254115018697 | [GitHub](#) | [LinkedIn](#) | [Website Portfolio](#)

PROFESSIONAL SUMMARY

IT graduate and cybersecurity enthusiast, pursuing an entry-level Security Analyst / IT Specialist role. Specializing in log analysis, security monitoring and security automation, with hands-on practice in incident response, vulnerability assessment and network security monitoring through a self-directed home lab and CTF platforms. Strong analytical thinking, attention to detail and a fast-growing technical foundation.

CORE COMPETENCIES

SOC Analysis • Threat Detection • Incident Response • Monitoring & Log Analysis • SIEM Tools • Malware Analysis • IDS/IPS • Firewall Fundamentals • Incident Ticketing & Escalation • Network Troubleshooting • IT Helpdesk & Technical Support • Technical Documentation & SOPs • Communication

TECHNICAL SKILLS

Languages & Scripting: Python, Bash/Shell, PowerShell, SQL, JavaScript, C/C++

Security Tools & Technologies: Wireshark, Burp Suite, SIEM fundamentals, IDS/IPS concepts, Firewalls, Cisco Networking (NetAcad)

Operating Systems & Virtualization: Ubuntu, Kali Linux, Parrot OS, Windows

IT Specialist Practices: Hardware & software troubleshooting, OS installation & configuration, Active Directory & user account management, printer/peripheral setup, remote support tools, patch management, backup & recovery, asset management, VPN & remote access support.

Core Security Concepts: SOC analysis, incident response, threat hunting, log analysis, network scanning & reconnaissance, vulnerability enumeration

EXPERIENCE

IT Support Intern — Bush & Beyond Ltd

2025

- Monitored and supported wired/wireless network infrastructure, troubleshooting connectivity issues to maintain uptime for staff — early hands-on exposure to network monitoring and issue triage.
- Resolved hardware, software, network, and Microsoft 365 (Outlook, OneDrive) issues as first-line IT support, sharpening incident-resolution and user-support skills relevant to SOC ticket triage.
- Built a custom backend automation program to filter property configurations by defined logic, reflecting a growing focus on security automation.
- Authored technical SOPs and training documentation using Adobe applications, supporting clear, repeatable operational processes — directly transferable to SOC runbooks and playbooks.
- Optimized OneDrive-based cloud file management to improve data accessibility and backup, while administering AV/collaboration systems (Microsoft Teams), Mailchimp email distribution, Squarespace website content, and enterprise booking/itinerary platforms.

HANDS-ON HOME LAB

- Building and maintaining a virtualized home lab on an Ubuntu host running Kali Linux, Parrot OS, Windows 10, Metasploitable 2 and Metasploitable 3 to practice network traffic analysis, scanning and reconnaissance.
- Use Wireshark and Burp Suite to inspect network traffic and test web application behavior, studying both attacker and defender perspectives.

CTF PRACTICE & CONTINUOUS LEARNING

- Actively solving challenges on TryHackMe, Hack The Box, Hackviser, OverTheWire, Hacker101, CyberDefenders, KC7 Cyber, and HackerDNA, while building networking and security fundamentals through Subverted.io and Cisco Networking Academy.

PROJECTS

- **CVE Lab** — Hands-on lab exploring and documenting real-world CVEs. github.com/Stacyy-Were/CVE-Lab
- **Device Fingerprint** — A project exploring device fingerprinting techniques. github.com/Stacyy-Were/Device_Fingerprint
- **CampusCompas** — A campus-focused build. github.com/Stacyy-Were/CampusCompas
- **HackerDNA-CTF** — Write-ups and solutions from HackerDNA CTF challenges.

EDUCATION

Bachelor's Degree in Information Technology — Jomo Kenyatta University of Agriculture and Technology (JKUAT) | 2023 – 2025

Diploma in Information Technology — Jomo Kenyatta University of Agriculture and Technology (JKUAT) | 2020 – 2022
